

Kia ora Whanau

Here are the selected options for Term Two for learners in Connected 1 and 2 classes. Please read through the options that are available. Your child will get one from column one and one from column two. If they have done an option already for instance Photographic Eye they will not be able to do this again in Term 2. In the google form they will do in Ako time next week they will be asked to rank their choices.

Column One	Column Two
Challenge	Proof (Science)
International Foods	Drop Dead Thread (Fabric Technology)
Japanese language & Culture	Hard Materials
Horrible Histories	Produce a Hit (Music)
Photographic Eye	Secret of Drawing
Drama	Spanish

HEALTH & PHYSICAL EDUCATION	
Challenge	Our challenge programme will offer opportunities for on and off site physical adventures. Learners will be able to meet these challenges both individually and in teams. No challenge is out of reach!
LANGUAGES	
Japanese Language & Culture	The 21st century is being called The Asian Century. The economic, geopolitical, and cultural importance of Asia to New Zealand make studying Japanese language and culture compelling. Japanese is a fascinating language and learners will actively participate in learning to speak, read, and write in Japanese.
Spanish	Spanish is the second most widely spoken language across the world. Begin studying the spanish language and develop their communication skills by learning to speak, write and read in Spanish..

ARTS-Visual and Performance	
The Photographic Eye	Learn the basics of the digital camera, digital photo processing and photo printing through the explorations of straight photography and the photographers who pioneered photography as art.
Producing a Hit	Want to be the next Pharrell Williams? In this course learners will get the chance to produce

	and master music with Digital Audio Workstations such as GarageBand, Pro Tools and Mixcraft 7.
Drama 101	Learn how to devise drama, use techniques to perform script and explore theater history through an extremely practical class.
The Secret of Drawing	Learn to draw realistically and expressively with a variety of media both wet and dry. Learn to look at what makes a good drawing and how to implement what you learn into your own drawing.
TECHNOLOGY	
Food with an International flavour	Learn how to prepare international dishes using safe food and hygienic practices. Research will be done into each country's staple food source and what influences this.
Hard Materials	Design and build your projects using a variety of engineering materials. Learn to work with metal, wood, plastic and even glass using hand tools and machinery. Computer aided manufacturing processes are also available.
Drop Dead Thread	Learners will learn a variety of sewing techniques, read patterns. By learning to develop these skills you will be able to create your own products, beginning with a Teddy Bear and advancing to other products.

SOCIAL SCIENCES	
Horrible Histories	Students will learn about Ancient Egypt, Ancient Greece and Ancient Rome. These early days saw beetles and cats worshiped as gods, the great pyramids transformed kings into stars, the monstrous Minotaur roamed his underground labyrinth, 300 Spartans defended against 150,000 attackers at Thermopylae, death ruled in the gladiatorial Colosseum, and Emperor Caligula loved his horse so much he fed it gold.
SCIENCE/SOCIAL SCIENCE	
Proof	Have you got what it takes to solve a crime? In this selected you will have the opportunity to learn how scientists use admissible evidence and apply this into law by solving a crime and then making your own crime scene for others to solve.
